M.TECH (DATA SCIENCE)

PROGRAMME OUTCOMES (POs)

PO1	Carry out research/investigation and development work to solve complex data analytical problems
PO2	Write a substantial technical report/document and to communicate effectively with a wide range of audience
PO3	Demonstrate a degree of mastery over the area of Data Engineering by applying current techniques, skills and modern tools
PO4	Conceptualize and solve data engineering problems using Mathematical, Statistical and Machine Learning concepts to arrive at feasible and optimal solutions for societal benefits
PO5	Use data visualization and analytics tools and technologies to analyze business models and solve real world problems
PO6	Learn independently and engage in lifelong learning with understanding of professional, social and ethical responsibilities for the need of sustainable development
