About

Every learned individual in their own version universally acknowledge that Education is not about learning from books alone, but it's a well-rounded growth of an active mind.

Real challenges of life encounters every individual without any discrimination or exception, only a well-developed and intriguing mind can deal with these issues with much needed tact. Hence education paves the way for such structural growth. Education is not about reading the books alone, it's a calculated effort excreted towards enhancing the overall strength both physical as well as intellectual and emotional to overcome the challenges that life offers oneself.

It is our deep rooted believe and ethos of this prestigious institution that provides curriculum that talks to the needs of the real time work scenarios and trains the individuals to be a better citizen in the community that they are living. With this thought process we would like to inform you that life in college is a memorable experience and not just about classes but about developing one's extra-curricular talents and growing as an individual, rather than ending up being a one dimensional techie.

SUMMIT encapsulate this very thought and enforces a practical approach to this philosophical idea by including Cultural clubs like the music club, dance club, debate club, etc., which help one to nurture their talent as well as provides a platform for the new incumbents to the institution to showcase their talent both academically innovative as well as extracurricular. Secure recognition from all parties involved in the learning journey be it faculty or senior students, affords an opportunity to excel further in nurturing and grooming ones talent by exposing themselves to the various intercollegiate events as well as industry organized events. This Summit event gives you sense of camaraderie as well as enforces a culture of team spirit and collaborative learning. Most importantly gives one a sense of self believe and self-pride in their achievement which is very crucial to ones success in life after college.
