SIDDHARTHA ENGINEERING COLLEGE**
(AUTONOMOUS)
VIJAYAWADA-520007

Physical Infrastructure Space	Area In Square Feet
Incubation Space Utilized Area (Office Cabins & Cubicles)	2,500
Fabrication Lab & Design Space	2,700
Conference & Meeting Rooms	1,200
Seminar Halls/Training Room	1,497
Co-Working Space	1,500
Open Area, Washrooms & Lifts	1,200
Total Incubation Space Area	10,597
Advanced Research Facilities	27,500
Total Available Space	38,097

Incubation Space:

Open Area/Entrance

Computer Lab for Designing

Waiting Hall

Training Room/Meeting

Staff Cabins

Staff Cabins

Co-Working Space

**Details of the Equipment & Facilities available for Start-ups / Innovators
Sectors: Agri Tech & allied industries, Edu Tech & Smart Tech**

S.No	Name of the Equipment	Image of the Equipment	Applicative usage of the Equipment
1	PCB Drilling Machine		Useful for creating holes, slots, or cavities as per PCB layout.

2	Honeywell DCS c200		Useful to identify process control parameters in batch applications.
3	PCB Prototype Machine		Useful for development of circuit and analyse the criticalities of the board by sample testing and performance analysis.

4

3D Printing Machine

Useful for prototyping enclosures, components, parts for analysing design verification for manufacturability & assembly.

5

Electric Vehicle
(2-wheeler) Test
bench

Useful for testing dynamics of wheel movement in
Electric Vehicle

6

Battery charging and discharging test kit

Useful to analyse the battery performance and wear & tear of charging & discharging in Electric Vehicle

7

Agricultural robot

Useful for understanding and simulating agricultural practices in real field.

8	3-D Printer			Useful for prototyping enclosures, components, parts for analysing design verification for manufacturability & assembly.
9	Coordinate Measuring Machine(CMM)			Useful for measurement of the machined parts and accessories in manufacturing, automobile, electronics, etc.

10	Welding			<p>The purpose of welding is to Useful to bind metals together in certain shapes to provide strength, durability and safety. Types of welding available are : Arc welding ,Spot welding , MIG welding ,TIG welding & Gas welding</p>
11	3D Printing Laboratory			<p>Prototyping of complex and intricate parts using PLA and ABS material</p>

12	Machine Shop			<p>Useful for forging of final shape as per design.. Custom parts in metal are also created Machines available are JMTC make all geared shaping M/c Planing Machine , Popular Shaping M/c Pilot Lathes ,Capstan Lathe ,HMT all geared Lathe ,MMM Lathes, Adision Milling M/c Chop saw cutting machine , IDAG801 Angle Grinder, Slotting Machine, Surface Grinder Omega Milling Machine, Universal Milling Machine , Centre Lathes ,Radial Drilling Machine</p>
13	Hand Operated Injection Moulding Machine			<p>Useful in making small plastic parts of appliances</p>

14	Computer Lab		<p>Application Softwares are used to create, analyze, and modify components, assemblies, and systems. Available Design and Analysis softwares : CATIA V5 R18 ,PRO / Engineer(PRO-E) , ANSYS 19.2 , MECHANICAL DESK TOP,FLEXSIM SIMULATION,MATLAB, MASTER CAM X7 , HYPERWORKS, IRON CAD</p>
15	NX Academic Perpetual License Core+CAD		Product Design & Validation

16	Computer Integrated Optical Microscope			Useful for analysing the topography of the surface
17	CNC Machines (JV 55 Vertical Machining Center Siemens 828D CNC System Smarturn CNC Lathe)			Manufacturing for machining metal parts

18	ABB Spot Welding Robot	 A white ABB Spot Welding Robot is positioned on a work table. The robot has a black cable and is surrounded by safety railings. The work table has a sign that reads "SPOT WELDING WORK TABLE" and the "CNC India" logo with the tagline "Relationships. Innovations.".	Used to join sheet metal
19	ABB Arc Welding Robot	 A white ABB Arc Welding Robot is positioned on a work table. The robot is surrounded by safety railings. The work table has a sign that reads "ARC WELDING WORK TABLE" and the "CNC India" logo with the tagline "Relationships. Innovations.".	Useful for high-quality welds in a shorter cycle time with manufacturing flexibility.

20	Tesla V100 32GB GPU card-AI/ML deep learning lab		Useful for AI computing multiple parallel operations. .
21	AR VR Lab	 <p>12/04/2023 10:50</p>	Visualize the product in virtual mode useful for product refinements saving product development time

22

Concrete 3D Printer

Useful for preparing concrete blocks of different shapes & sizes and check the material property for mass production in construction field.

Details of Equipment available for Innovators / Startups

Sector: Med Tech

S.No	Name of the Equipment	Image of the Equipment
1	High Performance Liquid Chromatography	 A photograph of a High Performance Liquid Chromatography (HPLC) system. The system consists of several interconnected modules, including a pump, injector, and detector. A sign in front of the equipment reads "HIGH PERFORMANCE LIQUID CHROMATOGRAPHY". Two plastic bottles are visible on top of the equipment.
2	Fourier Transform Infrared Spectroscopy	 A photograph of a Fourier Transform Infrared Spectroscopy (FTIR) instrument. The instrument is a compact, blue and white device with a sample compartment. A sign in front of the instrument reads "FOURIER TRANSFORM INFRARED SPECTROSCOPY-ATR".

3	UV-Spectro Photometer	 A white and grey UV-VIS Spectro Photometer-3200 by LABINCA. It features a control panel with a small screen and several buttons. A white label in front of the device reads "UV-VIS SPECTRO PHOTOMETER-3200".
4	Digital Refractometer	 A white digital refractometer by LABMAN. It has a black adjustment knob on top and a digital display on the front. A white label in front of the device reads "ABBE-DIGITAL REFRACTOMETER".
5	Tablet Friability Test Apparatus	 A teal and white tablet friability test apparatus. It has a red power button and a large white circular component on the right side. A white label on the front reads "TABLET FRIABILITY TEST APPARATUS".

6	pH Meter	
7	Digital Nephelo Turbidity Meter	
8	FTIR Hydraulic Press	

9	Dissolution Test Apparatus	
10	Heavy Duty Stirrer
