

Department of Information Technology

VR Siddhartha Engineering College

A Report On Workshop “DIGITAL TECHNOLOGIES”

Title : Digital Technologies

Date: 13-09-2019

Programme Co-ordinators:

Mrs.P.Ramya, Assistant Professor

Department of Information Technology,

V R Siddhartha Engineering College, VJA-07

Resource Person:

Sri M. S. Subrahmanya, Delivery Head, TCS

Participants: Total: 110 students of B.Tech IV/IV

About Digital Technology:

Digital technologies and connectivity, cobotics, additive manufacturing and virtual reality: the juxtaposition of these technological innovations creates a cyber-physical environment that results in completely rethinking the way assets and industrial processes work. The industry of the future will be an industry in the era of the digital revolution, capable of producing more smartly, more efficiently, more quickly, more safely, and more cleanly. Pascal Brier identifies four major impacts of the digital revolution on the industrial world.

Objective of the Workshop

- The main aim of this programme is to enhance the knowledge in current trends in the upcoming digital world
- To provide students with a knowledge on variety of technological products to explore and encourage them to explore s
- To make the Students to gain a sense of what they may be able to achieve as they undertake their own technological practice to find solutions to identified needs and realise their career opportunities.

Workshop Outcome:

- Students were very interested in knowing about the new digital solutions in the market
- Students learned basic of how to design quality, fit-for-purpose digital solutions.
- They got basic understanding on manipulating and combining data, using information management tools to create an outcome while also developing understandings of how to build, install, and maintain computers, networks and systems so that they are secure and also efficient.

Enclosures:
