Profile:

Shri Raghu Raaman Thiyagarajan

AGM – Tech Evangelist at EMURGO Academy India

Raghu is a self-learned blockchain architect, developer and a passionate trainer. He has real time experience in building decentralized blockchain applications using Solidity, Hyperledger, ReactJS, NodeJS, Web3 JS, Next JS, Bootstrap, Material- UI, Ant Design, MeteorJS, Ruby and GoLang. He has been evangelising for more than 18 months as blockchain developer and has trained multiple professionals and developers on blockchain use-cases and development.

He started his career as Research Associate at Cognizant and has worked in top companies like Standard Chartered Global Services and Barclays Shared Services as a Team Lead and Financial Analyst respectively. After working approximately for 5 years at MNCs, he co-founded a start-up known as CelebratON.in in December 2017. CelebratON.in is an online event essentials aggregator which brings together all the essential services for celebrations under a single roof.

He has done various Blockchain Certifications. Few of them are - IBM Blockchain Foundation Developer (By Cognitive Class, IBM), Blockchain Architecture Design and Use Cases (By NPTEL, IIT Kharagpur) and Introduction to Digital Currencies (By University of Nicosia). He is a certified Ethereum & Solidity Programmer as well.

Raghu has worked on projects like –

- 1. Decentralized Crowd-Funding**
Tech Stack – Solidity, React JS, Material- UI, Chai
- 2. Decentralized Auction**
Tech Stack - Tech Stack – Solidity, React JS, Material - UI, Chai
- 3. Cryptocurrency Exchange**
Tech Stack – Solidity, React JS, React-Bootstrap, Chai

He is an MBA from BIM, Trichy, India and done his B.E. from Jeppiaar Engineering College.

Blockchain technology is an emerging technology suitable for decentralized and transactional sharing of data across a large network of untrusted participants. By using this technology one can maintain continuously-growing list of records called blocks and link them in a distributed manner (blockchain), potentially in such a way that these are secured against tampering. Blockchain is maintained as distributed database of records of transactions (distributed ledger) that are shared among participants. This technology uses cryptographic algorithms to validate the logged transactions and ensures that no record is duplicated and also permanent records are updated on each node of the network. This technology allows new type of distributed software architecture where components can establish trust by finding concurrence on their shared states.

Blockchain have good potential to transform the logging and management of transactions in different application areas. This technology is successfully used in Bitcoin

virtual currency and it also has good potential in non-financial sectors such as Governance, healthcare, cyber security, automobiles, media, travel, hospitality, energy, smart cities etc. Considering the growing importance of Blockchain Technology and its potential in different sectors, this one day workshop is planned and sessions would be delivered by experts from EMURGRO GLOBAL, who are considered as pioneers in this domain.

The main objective of this workshop is to provide overall introduction to Blockchain technology and its application in real world organisations.

A blockchain is essentially a distributed database of records or public ledger of all transactions or digital events that have been executed and shared among participating parties. Each transaction in the public ledger is verified by consensus of a majority of the participants in the system. And, once entered, information can never be erased. The blockchain contains a certain and verifiable record of every single transaction ever made. Bitcoin, the decentralized peer-to-peer digital currency, is the most popular example that uses blockchain technology. The digital currency bitcoin itself is highly controversial but the underlying blockchain technology has worked flawlessly and found wide range of applications in both financial and non-financial world.

The topics covered during this Workshop are:

- Introduction to Blockchain technology
- Decentralized applications & Blockchain
- Application scenarios in Banking & FinTech and Governance
- Hyperledger Blockchain
- Opportunities, Societal impact and Challenges

To
The Principal,
VRSEC

Respected Sir,

Sub: Submission of bills towards organization of One Day workshop on "Blockchain Technologies" on 9th DECEMBER 2019 - reg.

This is to bring to your kind notice that with your prior permission, the Department of CSE has organized a One Day workshop on "**Blockchain Technologies**" in collaboration with **EMURGO Global** on 9th December 2019. Approximately 224 students of 2nd and 3rd year B.Tech have attended the workshop. The total amount incurred towards the organization of this event is **Rs. 2547/- (Two Thousand Five Hundred and Forty Seven)**. Mr Raghu Raaman Thiyagarajan, AGM- Tech Evangelist at EMURGO Academy India has acted as the resource person for this workshop. Here with, we are submitting the bills along with the details for your kind perusal.

S.No	Description	Amount(Rs)
1.	Banners	1126
2.	Stationary	520
3.	Snacks	901
Total		2547

Thanking you,
