ONE WEEK FACULTY DEVELOPMENT PROGRAM
on

HIGH QUALITY MEDICAL DIAGNOSIS USING DATA SCIENCE
FOR SOCIETAL BENEFITS

21st – 25th September, 2020
3.00 pm - 6.10 pm

under AICTE Margadarsan

Chief Advisor

Dr.A.V.Ratna Prasad
Principal, VRSEC

Convener

Dr.SuneethaManne
Prof & Head,
Dept. of IT, VRSEC

Chief Coordinator

Dr. D. Rajeswara Rao
Professor & Head
Dept. of CSE, VRSEC

Programme Coordinators

Dr.T.Anuradha, Professor
Mr.Ch.Pavan Kumar, Asst.Prof.
Dept. of IT, VRSEC

PROGRAMME SCHEDULE

21.9.2020	<i>Data science(DS) Life cycle, Characteristics of Health care data, Research gaps in DS for Health care data</i>
22.9.2020	<i>Complete step-by-step Data Science process for diabetes prediction using Python Libraries</i>
23.9.2020	<i>Computer aided detection(and diagnosis (CAD) in medical imaging</i>
24.9.2020	<i>Computer Aided Analysis of Medical Images (Research case study on breast cancer detection).</i>
25.9.2020	<i>3-D Optimized Classification and Characterization Artificial Intelligence Paradigm for Cardiovascular/Stroke Risk Stratification using Carotid Ultrasound-based Delineated Plaque</i>

RESOURCE PERSONS

Ms. Gayathri Nagarajan Data Science Mentor & Scientist, Springboard, Germany.	Dr. Nilanjan Dey Asst. Professor, Techno International, New Town. Visiting Fellow, Department of Biomedical Engineering, University of Reading, UK. EIC of IJACI, IGI Global & STNIC Series, Springer Nature.
Dr. Vikrant Bhateja Associate Professor & Dean, SRMGPC, Lucknow. EIC for IJNCR, IGI Global.	Dr. Suneet Gupta Professor, Department of Computer Science, Benett university, Noida .

SIDDHARTHA ENGINEERING COLLEGE**
(Autonomous)
VIJAYAWADA

8	Total Cost involved Rs. 25,000/- (Rupees in words)	Rs 25,000/- (Twenty-five Thousand Rupees)
9	Whether any advance will be required YES / NO If YES, Rs...	Rs 25,000/- (Twenty-five Thousand Rupees)
10	Name of the Faculty on whom the advance is booked	Dr. T Anuradha
11	Is the above mentioned programme covered in departmental TNA? Yes/No;	No
12	If No, then the H.O.D has to forward a note for inclusion of the programme to the Head of the Institute	Faculty can develop required skills and deep knowledge about Data Science in Medical Domain and implement real time case studies.
13	Foreword Note by HOD: Teaching strategies are the culmination of the educational process, which allows us to achieve the objectives and makes the student acquire the skills and abilities needed. Participating in pedagogical training not only helps teachers understand the teaching-learning process, which is crucial for planning and teaching courses, but also strengthens teachers' self-efficacy beliefs

ENGINEERING COLLEGE

ONE Week Faculty Development Program on

**HIGH QUALITY MEDICAL DIAGNOSIS
USING DATASCIENCE
FOR SOCIETAL BENEFITS**

21st – 25th September, 2020

under AICTE Margadarsan

Department of Information Technology, Velagapudi Ramakrishna Siddhartha Engineering College, Vijayawada conducted a One Week Faculty Development Program on “High Quality Medical Diagnosis using Data Science for Societal Benefits” from 21st to 25th September, 2020. The Faculty development Program focus on Data science(DS) Life cycle, Characteristics of Health care data, Research gaps in DS for Health care data and automated medical diagnosis using Structured and Unstructured data. The programme enable the participants to do quality project/research works in the domain of medical data analysis. The FDP intends to cover major applications and issues of Diabetes prediction, Breast Cancer Prediction, Cardiovascular/Stroke Risk Stratification, Computer aided detection(and diagnosis (CAD) using different kinds of medical imaging. It includes demonstration of structured medical data analysis using python, feature selection from medical images, segmentation of medical images, training the predictive models using machine learning and deep learning techniques, optimization techniques used.

Objectives of the FDP:

- To expose the participants with the concepts of Data Science
- To demonstrate and apply skills about Data Science and how to apply DS in solving real world problems in medical diagnosis.
- To introduce the participants to the high-quality medical diagnosis with structured data

Outcomes of FDP:

- Exposure to different research issues to be addressed for medical diagnosis
- Academic and research skills in medical data analysis
- Open ended problems in medical image processing
- Knowledge on different medical data sets

Data wrangling

What is data science?

Predictive analytics? Machine learning?

Big data? Data mining? Business intelligence?

Exploratory data analysis

Sources of health data

Research gaps in health

FDP REPORT DAY 2

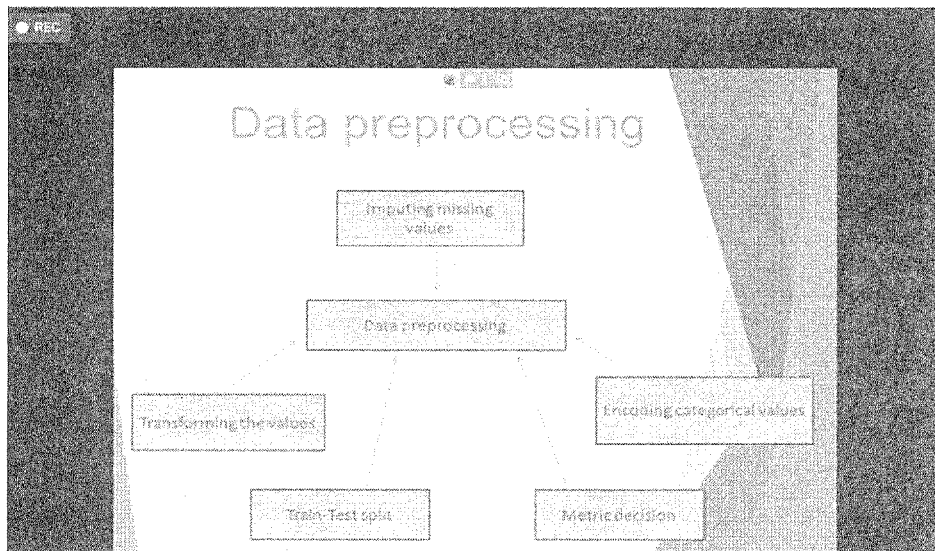

DATE: 22/09/2020

Day 2 Topic: Complete step-by-step Data Science process for diabetes prediction using Python Libraries

Resource Person: Ms. Gayathri Nagarajan, Data Science Mentor & Scientist, Springboard, Germany.

On the second day of fdp, the resource person Ms. Gayathri has explained different Python libraries required for medical diagnosis using data science. She also discussed about Tensorflow and keras open source libraries and how to use them and how to execute a machine learning algorithm in Google Collab. She demonstrated how to do preprocessing, build model using machine learning algorithms like decision tree, SVM. How to evaluate the model and present the research results using various kinds of plots.

In the second session, Ms. Gayathri has demonstrated a case study of diabetic prediction by taking a structured data set. She implemented her case study in Python with Anaconda jupyter notebook. Participants asked about how to get datasets related to covid, for that she suggested to use gov. in website. All the participants were very much satisfied with the presentations given by Ms. Gayathri on day 1 and day2 and given a positive feedback.

A terminal window displaying a directory listing of files and folders. The output includes names like 'bin', 'lib', 'share', and 'usr'. A small video feed of a person is visible in the bottom right corner of the terminal window.

A terminal window displaying a directory listing of files and folders. The output includes names like 'bin', 'lib', 'share', and 'usr'. A small video feed of a person is visible in the bottom right corner of the terminal window.

FDP REPORT DAY 3

DATE: 23/09/2020

Day 3 Topic: Computer aided detection (and diagnosis (CAD) in medical imaging

Resource Person: Dr. Nilanjan Dey

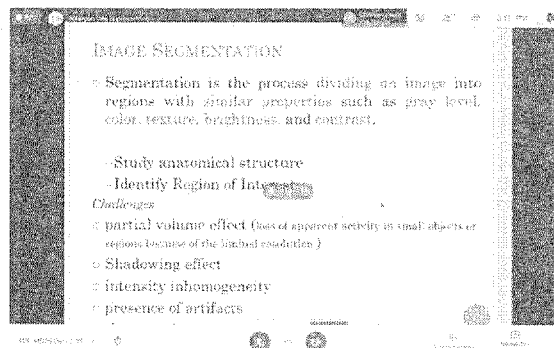

Asst. Professor, Techno International, New Town.

Visiting Fellow, Department of Biomedical Engineering, University of

Reading, UK, EiC of IJACI, IGI Global & STNIC Series, Springer Nature.

On the third day of fdp, in the first session, the resource person Dr. Nilanjan Dey started his lecture with what is Computer aided Diagnosis and how it can assist radiologists and then how it can be used for highly complex pattern recognition from medical images like X-rays, CT, MRI or Ultra Sound images. Then he discussed what the need of preprocessing in medical images is and what are the steps in preprocessing applicable especially for medical images. Then he explained how to extract the features based on color, texture and shape with the case studies of diabetic retinopathy, and breast cancer images. Then he discussed about the problems with high dimensional vectors and different types of dimensionality reduction methods that can be used for feature subset selection.

In the second session, resource person explained how to do segmentation and identify the Region of interest from the image and then discussed how to do investigations on selected ROI for disease classification. He clearly explained how to do various kinds of segmentations like Amplitude segmentation, Region based Segmentation, Semi-automated segmentation and what are the limitation in each case. At the end Dr. Nilanjan discussed how to build convolution neural networks for medical image classification and about data augmentation. After the presentation by the resource person, participants actively interacted with him and clarified their doubts related to medical image classification and optimization techniques. All the participants were very much satisfied with the presentations given by Dr. Nilanjan and expressed it was an excellent presentation.

FDP REPORT DAY 4

DATE: 24/09/2020

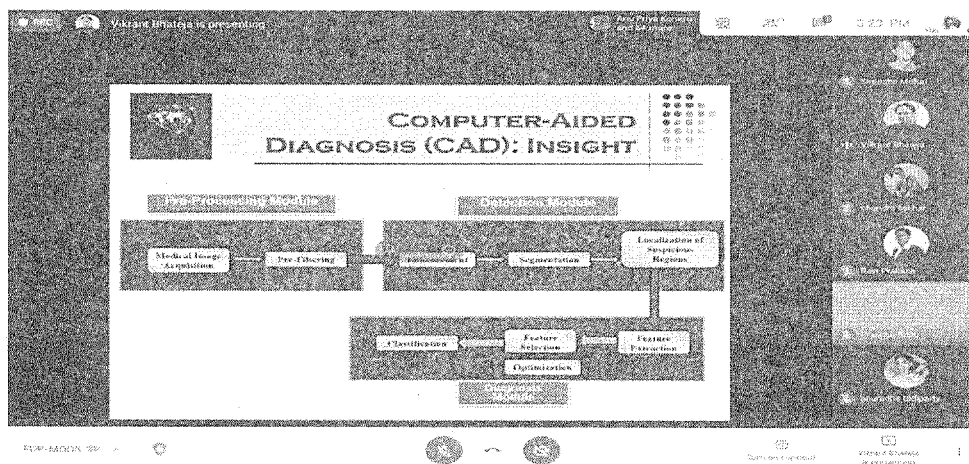

Day 4 Topic: Computer Aided Analysis of Medical Images (Research case study on breast cancer detection).

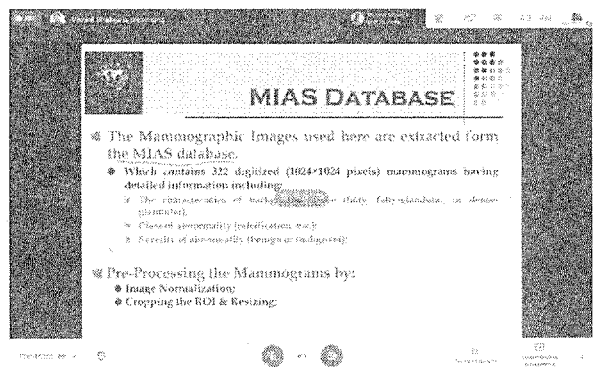

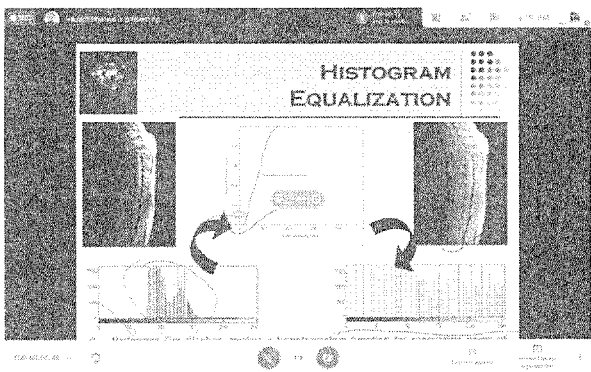

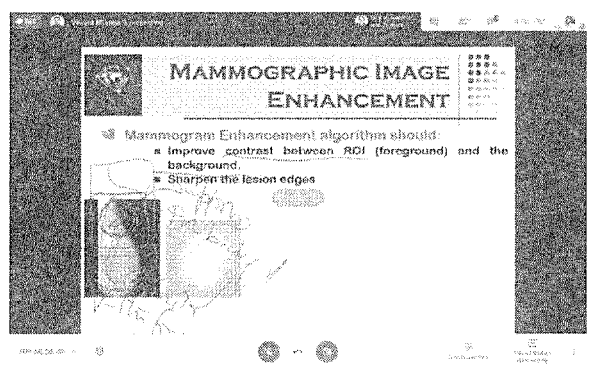

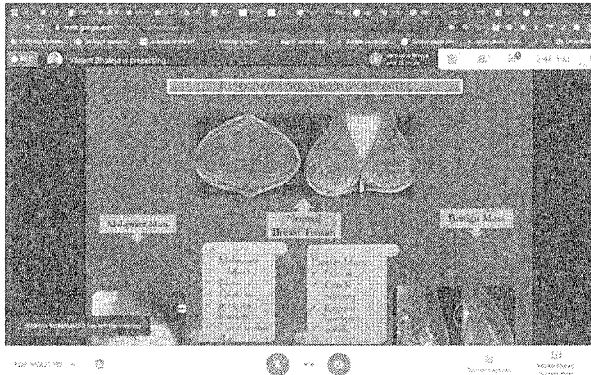

Resource Person: Dr. Vikrant Bhateja

Associate Professor & Dean, SRMGPC, Lucknow. EiC for IJNCR, IGI Global.

On the fourth day of FDP, the resource person Dr. Vikrant Bhateja started the first session with what are the modules in Computer aided analysis. Then Dr. Vikrant discussed about image enhancement algorithms for medical images and how these techniques effect the quality and noise in the image, what is the difference between normal image enhancement and medical image enhancement algorithms, what are the challenges in medical image enhancement and restoration.

In the second session, Dr. Bhateja, the discussion on some facts about breast cancer and how difficult it is to identify it at an early age. Then he discussed what are the modules in Computer aided analysis specific to breast cancer analysis, and why the mammographic analysis is difficult, What are the categories of lesions. He has shown the common bench mark data bases for mammographic analysis and how to apply classification algorithms. He demonstrated a case study of how to classify benign and malignant Images with MIAS data base. Then Dr. Vikranth demonstrated Mammogram Enhancement using unsharp masking and finished his lecture with histogram equalization techniques. Finally, Dr. Vikranth clarified the doubts asked by different researchers in question and Answer session. All the participants felt the session is very much informative.

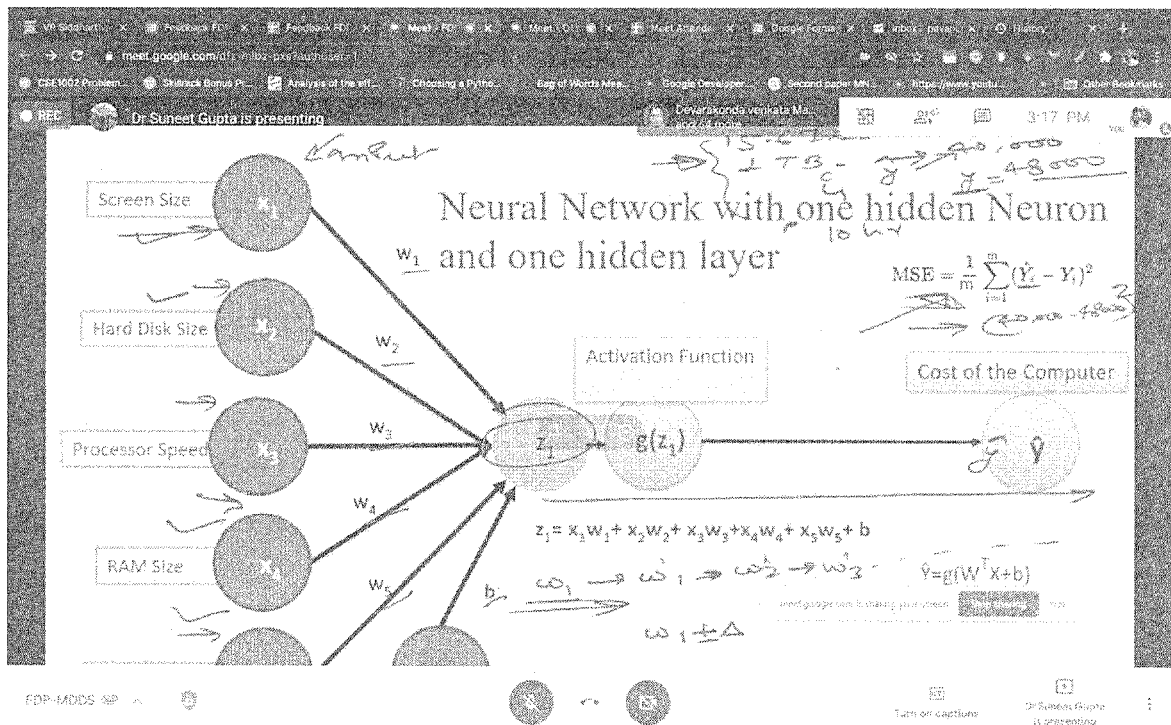

FDP REPORT DAY 5

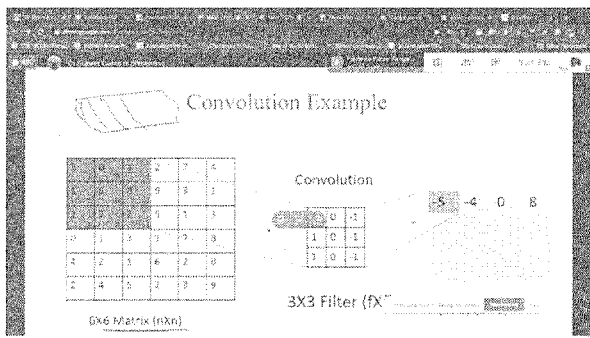

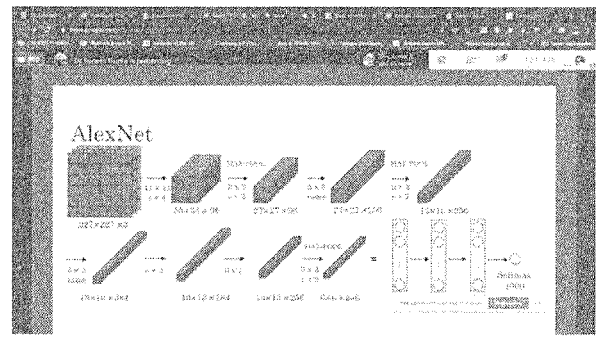

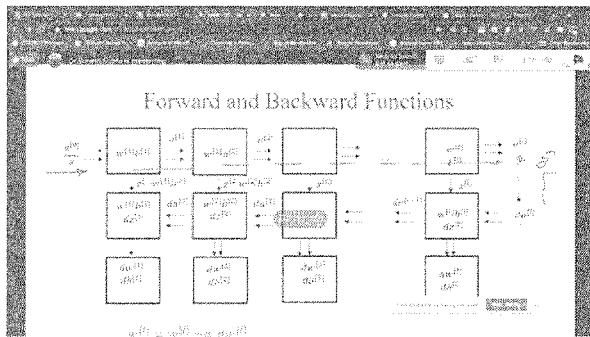

DATE: 25/09/2020

Day 5 Topic: 3-D Optimized Classification and Characterization Artificial Intelligence Paradigm for Cardiovascular/Stroke Risk Stratification using Carotid Ultrasound-based Delineated Plaque

Resource Person: Dr. Suneet Gupta
Professor, Bennett university, Noida.

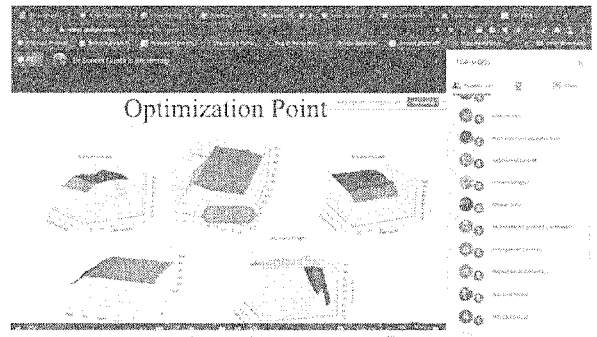

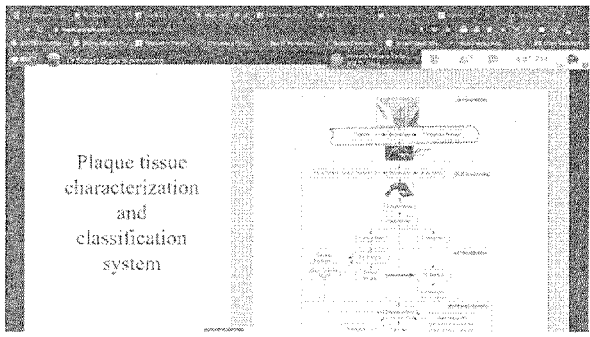

On the last day of FDP, the resource person Dr. Suneet Gupta started the first session with the discussion on artificial neural networks, convolution networks, how convolution can be understood as a mathematical function, different pre trained models. He has explained Alex net architecture and then transfer learning, how transfer learning can be used in case of small dataset for training. Dr. Suneet also talked on performance evaluation metrics and how to apply them on medical domain. He explained how to calculate accuracy, sensitivity, specificity, Kohen Kappa. In the second session, he discussed about different data augmentation techniques and about over fitting and under fitting and how to overcome and the effect of augmentation on model accuracy. Then Dr. Suneet Gupta discussed about Plaque tissue characterization and classification system. He demonstrated how accuracy changing with number of epochs, number of layers. Dr. Suneet then discussed about cross validation method. Finally Dr. Suneet demonstrated the code for Stroke Risk Stratification using Carotid Ultrasound-based Delineated Plaque using Google Colab.

Dataset Demography

- Total no. of samples: 2030
- Synthetic: 1000, Anaphylactic: 1000
- Mean Age with SD: 69.9 ± 7.8
- Gender Ratio: Male 61%, Female 39%
- Laboratory: Irvine Laboratory for Cardiovascular Investigation and Research, Saint Mary's Hospital, UKI
- Machine: APL Model HD 2000 Advanced Technology Laboratories, Seattle, WA, USA digital scanner with linear binocular width 4.7 MHz transducer in 2D grayscale B-mode.
- Subjects with concomitant symptoms to Covid symptoms (no studies) were excluded from the study.

At the end of the workshop we requested participants to switch on their webcams.

FDP on High Quality Medical Diagnosis using Data Science for Societal Benefits

under AICTE MARGDARSHAN
September 21 - 25, 2020.

Professor & Head
Dept. of CSE
VRSEC.

About VRSEC

First self-financed Engineering College in Composite state of Andhra Pradesh established in the year 1977 , offering 7 UG (B.Tech) courses with intake of 1140, 9 M.Tech(Specializations) - 180, MBA-60, MCA-60. Funded with Rs.6 Crores by World Bank and MHRD under TEQIP-II S.C.1.2. Recognized as 'Scientific & Industrial Research Organization (SIRO)' by DISR , MST Government of India since August , 2017. Only private college selected for MARGDARSHAN scheme by AICTE in A.P. and Telangana. 333+ total faculty with 115 Ph.D.s ,100 pursuing Ph.D.s. Collaboration with 7 foreign universities in USA and Australia.

About Department of IT

The Department comprises 30 eminent faculty, out of which 11 are having Ph.D and 20 are having M.Tech degrees in CSE, IT and Software Engineering. The department had 02 professors ,05 Associate Professors, 01 Senior Assistant Professor and 21 Assistant Professors. A total of 09 sponsored R&D Projects and grants are received from different agencies such as UGC , AICTE, NRSC-ISRO and E&ICT Academy. The number of papers published by the faculty in indexed journals are 164, in reputed international & national conferences are 88, and in Book Chapters are 27.

FDP Registration Details:

Academicians, Research Scholars who are intended to do quality project/research works can apply.
- Registration fee: **NILL**
- Session Timings: **3.00 PM to 4.30 PM**
and 4.40PM to 6.10PM

Registration Link:

<https://tinyurl.com/FDP-MDDS>

- All the registered participants will receive every day meeting link to join the FDP via WhatsApp & Email.

Attendance is mandatory for all the sessions to get the participation E-certificate.

Feel free to contact us, Pavan Chitturi
(pavanchitturi@vrsiddhartha.ac.in)
Mobile No: **+91-8985670186.**

Day -1,2 (21-09-2020,22-09-2020)

Ms. Gayathri Nagarajan
Data Science Mentor & Scientist,
Springboard, Germany.
Topics (Day 1): Session 1: Data science(DS) Life cycle, Characteristics of Health care data,
Session 2: Research gaps in DS for Health care data.

Topics (Day 2): Session 1: Introduction to python libraries for DS

Session 2: Complete step-by-step Data Science process for diabetes prediction using Python Libraries.

Day - 3 (23-09-2020)

Dr. Nilanjan Dey
Asst. Professor, Techno International, New Town.
Visiting Fellow, Department of Biomedical Engineering, University of Reading, UK,
EIC of IJACI, IGI Global & STNIC Series, Springer Nature.

Topics: Session 1: Feature selection in Computer aided detection(and diagnosis (CAD) over medical images ,
Session 2: Segmentation Techniques in CAD

Day - 4 (24-09-2020)

Dr. Vikrant Bhatnaja
Associate Professor & Dean, SRMGPC, Lucknow,
EIC for IJNCR, IGI Global.

Topics: Session 1: Computer Aided Analysis of Medical Images

Session 2: Research case study on breast cancer detection.

Day - 5 (25-09-2020)

Dr. Suresh Gupta
Professor, Bennett university, Noida.
Topic: Session 1: Neural Network models for Medical Imaging.

Session 2: 3-D Optimized Classification and Characterization Artificial Intelligence Paradigm for Cardiovascular/Stroke Risk Stratification using Carotid Ultrasound-based Delineated Plaque.

Top Skills

Data Science

Machine Learning Algorithms

Python (Programming Language)

Languages

Tamil (Native or Bilingual)

Kannada(spoken) (Elementary)

German(A1) (Elementary)

Certifications

Programming with Python for data science

Exploratory data analysis

Manipulating data frames with Pandas

Introduction to Python

Python datascience tool box - 1

Honors-Awards

Young woman educator and researcher

Best researcher in Data analytics

Publications

A survey on tying data to geographic locations in mobile – disconnected networks using boomerang protocol

A hybrid of whale optimization and late acceptance hill climbing based imputation to enhance classification performance in electronic health records

A novel approach for detecting hacking using data mining techniques

Feature engineering by a Brain-Computer progressively interactive Simulated annealing on Random Forest for Health data analytics

Gayathri Nagarajan

Data scientist|Data science mentor|ML Researcher|Speaker
Bad Vilbel

Summary

A data scientist exploring datasets, creating models and deriving insights from them. Works published in high impact scopus indexed journals. An online mentor for data science. A recipient of "Young woman researcher and educator" awarded by National Foundation of Entrepreneurship and Development and a recipient of "Best researcher in Data Analytics" awarded by Rula academy. Speaker in data science domain. A member of World Research Council.

Experience

Springboard

Data science mentor

January 2020 - Present (10 months)

Mentor for the 'Data science career track' course designed for corporate professionals for transition into data science.

Freelancer

Data Scientist

2017 - Present (3 years)

India, Germany

Explores the datasets and uses machine learning algorithms to model for prediction. Have knowledge on big data platforms such as Hadoop, Spark, Hive, Pig, Azure services and also in deep learning techniques. Familiar with SQL and uses Python and R language for implementation of the machine learning algorithms. Implements step by step data science processes such as missing data imputation, dimensionality reduction techniques, Feature engineering and modeling. Familiar with version control tool Git hub.

Vellore Institute of Technology

Researcher in Machine learning(Ph.D)

July 2016 - Present (4 years 4 months)

India

Works on analyzing health care datasets and researching on methodologies to improve the performance of prediction on high dimensional health care

An empirical comparison of six supervised machine learning techniques on spark platform for health big data" in International conference on smart intelligent computing and applications

datasets. Few methodologies are identified. Experiments are conducted and the papers published in scopus journals. Completed colloquium as on August 2020.

MVJ College of Engineering, Bangalore, India

Asst professor

2011 - 2016 (5 years)

India

Handled core subjects such as DBMS, Data structures, Analysis and Design of Algorithms, Software engineering, Data mining, programming languages such as C, C++, C# etc for computer engineering students. Have experience in developing software for automation of certain processes in the institution.

Yokogawa

Software Engineer

May 2007 - August 2010 (3 years 4 months)

Singapore

Worked with C++, C#.Net and SQL on projects related to industrial automation. Worked both in server and client side. Developed UI designs. Experience in using agile methods for development. Have experience in executing test cases, using memory leak, code coverage tools, source control tools etc.

Tata Consultancy Services

Software Engineer

2006 - 2007 (1 year)

India

Worked with mainframe. Experience in COBOL, JCL etc.

Education

VIT_Vellore Institute of Technology , India

Ph.D, Machine learning · (2016)

Shanmugha Arts, Science, Technology and Research Academy ,
India

M.tech, Advanced computing · (2004 - 2006)

University of Madras, India

B.tech, Information Technology · (2000 - 2004)

Nilanjan Dey is an Associate Professor in Department of Computer Science and Engineering at JIS Univeristy (under JIS Group), Kolkata, India. He has completed his PhD. in 2015 from Jadavpur Univeristy, Kolkata, India. He is *postdoctoral fellow of Universidad Internacional de La Rioja (UNIR), Spain*. He is a *Visiting Fellow of Wearables Computing Laboratory, Department of Biomedical Engineering Univeristy of Reading, UK*. He is the *Visiting Professor of College of Information and Engineering, Wenzhou Medical University, P.R. China*. He has held honorary position of *Visiting Scientist at Global Biomedical Technologies Inc., CA, USA (2012-2015)*. He is a Research Scientist at Laboratory of Applied Mathematical Modeling in Human Physiology, Territorial Organization of- Scientific and Engineering Unions, Bulgaria, Associate Researcher of Laboratoire RIADI, University of Manouba, Tunisia and Scientific Member of - Politécnica of Porto. Before he joined Techno India College of Technology, he has served as an Assistant Professor at JIS College of Engineering and Bengal College of Engineering and Technology. With more than 13 years of teaching and research experience, he has authored/edited more than 85 books with Elsevier, Wiley, CRC Press and Springer, and published more than 450 research articles. His h-index is 47 with more than 9000 citations. He is the *Editor-in-Chief of Int. J. of Ambient Computing and Intelligence (IJACI, IGI Global, UK, Scopus)*, *Int. J. of Rough Sets and Data Analysis (IGI Global, US, DBLP, ACM dl)*. He is the Series Co-Editor of *Springer Tracts in Nature-Inspired Computing (STNIC)*, *Springer Nature* and *Advances in Ubiquitous Sensing Applications for Healthcare (AUSAH)*, Elsevier, Series Editor of *Computational Intelligence in*

Engineering Problem Solving and Intelligent Signal processing and data analysis, CRC Press (FOCUS/Brief Series), De Gruyter Series on the Internet of Things and Advances in Geospatial Technologies (AGT) Book Series, (IGI Global), US, serves as an editorial board member of several international journals, including International Journal of Image Mining (IJIM), Inderscience, Associated Editor of *IEEE Access* (SCI-Indexed), and International Journal of Information Technology, Springer.

In addition, he was awarded as one among the *top 10 most published academics* in the field of Computer Science in India during the period of consideration 2015-17 during 'Faculty Research Awards' organized by Careers 360 at New Delhi, India on March 20, 2018. His main research interests include Medical Imaging, Machine learning, Computer Aided Diagnosis as well as Data Mining. He has been on program committees of over 100 international conferences and acted as a program chair/co-chair and/or advisory chair of more than 20 international conferences.

He has given more than 75 invited lectures in 10 countries, including many invited plenary/keynote talks at the international conferences such as ITITS2017 (China), TIMEC2017 (Egypt) and BioCom2018 (UK) etc. He is the Indian Ambassador of InterYIT (International Young ICT Professionals group of International Federation for Information Processing). He is a senior member of IEEE.

Dr. Suneet Gupta

NVIDIA CERTIFIED INSTRUCTOR | DEEP LEARNING AND UI PATH PROFESSIONAL | ASSISTANT PROFESSOR at BENNETT UNIVERSITY

Noida

Summary

Presently I am working as Asst. Professor at Bennett University, Gr. Noida in Computer Science Engineering department. My current research interests are Deep Learning, Brain-Computer Interaction, Wireless Sensor Network, Internet of Things and Natural Language Processing. Presently I am working on a Wireless Sensor Network based project funded by Department of Science and Technology, Uttar Pradesh. I am also working as reviewer of many international journals i.e. Computer Network, Wireless Personal Communication, Information Science etc.

Vikrant Bhateja

Associate Professor (EC); Head (Academics & IQAC) at Shri Ramswaroop Memorial Group of Professional Colleges, Lucknow
226015

Summary

Dr. Vikrant Bhateja is associate professor in Department of Electronics & Communication Engineering, Shri Ramswaroop Memorial Group of Professional Colleges (SRMGPC), Lucknow (U.P.) and also the Head (Academics & Quality Control) in the same college. He is doctorate in Bio-Medical Imaging & Signal Processing with a total academic teaching experience of 16 years with around 150 publications in reputed international conferences, journals and online book chapter contributions; out of which 18 papers are published in SCIE indexed journals. His areas of research include: digital image & video processing, computer vision, medical imaging, bio-medical signal processing and machine learning.

He has been instrumental in chairing/co-chairing around 15 international conferences in India as publication or TPC chair and edited 22 book volumes from Springer-Nature as a corresponding/co-editor editor on date and currently five books are in press. He is presently Editor-in-Chief of IGI Global--International Journal of Natural Computing and Research (IJNCR) an ACM & DBLP indexed journal since 2017. He is associate editor in International Journal of Ambient Computing and Intelligence (IJACI)—Scopus & WoS indexed journal under IGI Global press. Recently, he has joined as section editor in Recent Patents on Engineering (indexed in Scopus and EI/Compendex) published by Bentham Science publishers. He is also serving in the editorial board in couple of journals under Inderscience Publishers.

Dr. Vikrant has guest edited three Special Issues in reputed Scopus/ SCIE indexed journals--"Evolutionary Intelligence" and "Arabian Journal of Science and Engineering" under Springer-Nature. He has received the 'Certificate of Outstanding Contribution in Reviewing' for year 2016 and 2017 respectively in prestigious Elsevier journals like: AEUE, Measurements, Computer Methods and Programs in Bio-medicine.

Two of his conference papers have received "Best Paper Award" in International Conferences ICICT-2015 & ICTIS-2015. In 2016, his article published in Review of Scientific Instruments Journal (AIP Press) has been selected as "Editor-Choice" article of the issue. In January 2017, he has received the "Paper Presenter Award at International Conferences: 2015-16" at 51st CSI Annual Convention, Coimbatore. He is Senior Member of IEEE and has served in ExeCom of IEEE U.P. Section and also as Chair: IEEE Young Professional Affinity Group for Year-2016-17.
